

Air blown Fibre Singlemode (EPSU)

DESCRIPTION

Air blown optical fibre is typically used in micro duct installation applications. ABF can utilize in existing and new duct systems more effectively by accommodating more fibres in given subduct network. The fiber units is suitable for air-blown installation. Cable parameters such as cable diameter, stiffness and sheath friction is optimized for best installation performance.

The expected service life in normal use exceeds 30 years.

| Product number | Product name | Fibre Count | Cable Diameter |
|----------------|------------------------------|-------------|----------------|
| | Air blown Fibre Singlemode | | |
| | EPSU pre-terminated on reels | | |
