

Circuit integrity cables

DESCRIPTION

Circuit integrity fiber cables are used in environments where high fire safety is required and where the cable must maintain its function even during a fire. They are designed to withstand extreme conditions and ensure that vital communication is not interrupted. For example, in tunnels, at airports and in hospital environments. But also in buildings where escape routes must be secured and in industrial facilities where high demands are placed on operational safety.

Product number	Product name	Fibre Count	Cable Diameter
	Circuit integrity cables CLT		8.9 mm
	Circuit integrity cables MLT		15.1 mm
