

Microducts indoor Hybrid LSZH

DESCRIPTION

Hybrid LSZH microducts are designed for long term protection of fiber optical cables and are especially suitable for installation of micro cables. Indoor microducts are used for indoor installation applications with a sheath made of halogen-free, flame retardant material and primary ducts of halogen-free HDPE. Parameters such as flexibility and higher safety levels for fire and dangerous substances makes it optimized for safe and effective indoor installations. Every microduct has a permanent, co-extruded silicone compound inner liner giving a coefficient of friction of less than 0,1.

Product number	Product name
	Microducts indoor Hybrid LSZH 12-10mm
	Microducts indoor Hybrid LSZH 5-3.5mm
