

Microduct Single 12-10mm

12/10mm microducts are designed for long term protection of fiber optical cables and are especially suitable for installation of micro cables. Thin walled microducts are suitable for sub-duct installations. The ducts can either be blown or pulled into existing pipes to maximize the utilization of already existing infrastructure. The microduct are made of high-density virgin polyethylene (HDPE). Every microduct has a permanent, co-extruded silicone compound inner liner giving a coefficient of friction of less than 0,1.
