

Product name	Miller 1 Hole Fiber Optic Stripper FO 103-S
Product code	1649527
GTIN	7332811081262
ETIM-Class	EC000385

PRODUCT SPECIFICATIONS

When Precision Matters, the Original is Still the Best

The Miller® FO 103 Series of fiber optic strippers is the ONLY fiber stripper with stripping holes created by the wire EDM process, an exact and repeatable manufacturing process.

Other competitive tools utilize a grinding process to shape the stripping hole geometry. The profile can vary during production as the grinding wheel breaks down. The FO 103 has more precision and durability than the competition. Based on a statistical analysis of the stripping hole diameter, the consistency varies noticeably with the competition manufacturing technique.

- Singular hole design efficiently strips away the buffer coating from the bare fiber in one compact tool that is factory-set & requires no adjustment
- Manufactured to precise tolerances, its diameter holes & V-openings in blade allow for accurate & clean stripping without scratching or nicking the bare fiber
- Pivot pin, spring & precision handles with printed stripping reference enhance the functionality & durability of the tool

Measurements

Length	135 mm
Height	6 mm

Width	85 mm
Weight	71 g
